THE WAINWRIGHT STAR.

VOLUME II. NUMBER 4. WAINWRIGHT, ALBERTA, THURSDAY, NOVEMBER 18, 1909 H. E. CUMMER, EDITOR

Local and General News

Items of Local Interest Gathered From Many Sources During the Past Week

Bisson & Laird's new store will be completed in a few days.

The Stuttz Theatre Co. are registered at the Wainwright Hotel.

The new postoffice building will be completed by the end of next week.

Carpenters are busy erecting a large addition to the Massey Harris warehouse.

R. Akroyd and family leave shortly for Edinburgh, Scotland, where they will spend the winter.

J. H. Fraser, of Edgerton spent a couple of days in town this week on his way to Edmonton.

The new band will hold their first practice tonight. Harry Limpert has been appointed band master.

R. C. Buckley has been awarded the contract for the erection of a fine cottage on Bobby Knoll for H. G. Fletcher.

The local lumber yards have each received large shipments of lumber and building material during the past couple of weeks.

The new Park Hotel will be opened on Monday evening next, when L. P. Hussey will be the host at a free ball. See his announcement elsewhere in this issue.

It is expected that Duncan Marshall, Minister of Agriculture in the Provincial Parliament, will be reelected by acclamation for the Olds constituency.

J. E. Hide, managing director of the Western Canada Fire Insurance Co., of Calgary, was in town on Tuesday. While here he appointed H. C. Duff the local agent for the company.

Local representatives have been notified that the International Harvester Co. and the Canton Plow Co. have amalgamated, as also have the Frost & Wood Co. and the Cockshutt Plow Co.

The anniversary services of the St. Andrew's congregation, which were announced for Nov. 28th have been postponed indefinitely, in order to make way for the evangelistic campaign commencing on that day. Rev. W. S. Mobre, of East Prince Albert will be the missioner in charge of the services here. This evangelistic campaign is extended over the entire Presbytery and will be continued for some weeks. Rev. Mr. Moore comes highly recommended and it will no doubt prove profitable to hear him.

Building operations as a rule show the progress a town is making. It would do any person, who doubts the statements which appear in the Star from time to time about the growth of Wainwright, a great deal of good and would convince them of the truth of our reports if they could only take a trip through the town and see the large number of fine buildings now under erection. The residents have already got beyond the shack days and are building fine residences in different portions of the residential district. Several fine business blocks are also under construction and many more are projected as soon as it is possible to secure carpenters.

Successful Masquerade

First Annual Ball Of The Volunteer Fire Brigade a Splendid Affair

The first annual masquerade ball of the Wainwright Volunteer Fire Brigade in the Auditorium on Friday evening last was the most successful affair of the kind ever held in the town. A large number of the townspeople were present and everyone spent a very pleasant evening.

The hall was tastefully decorated for the occasion and the boys made a fine showing with their appliances. The costumes worn by the dancers were also far ahead of any previous occasion and the judges had a very difficult task in picking out the winners. Special music was engaged for the occasion and to say the least, it was a grand affair. Tables were tastefully arranged for the supper on the stage and a bountiful repast was served at midnight by the committee, Messdames Dawson, Small, Richardson and Dewar.

The prize winners were:

Best dressed couple—H. C. King and Miss E. Mutz, who represented the "Mikado" and "Katisha."

Best dressed lady—Mrs. M. L. Potter, as "Gipsy Girl."

Best dressed gentleman—H. V. Fieldhouse, "Robin Hood."

Comic Costume—F. Goulet, "Happy Hooligan."

The judges were: Messrs W. J. Musson, R. A. Snyder and W. S. Mills.

The new Wainwright is growing fine.

W. H. Freed, the Irma implement agent, spent a few hours in the village.

Wainwright business men are beginning to feel the benefits of the excellent season we have experienced during the past year. The streets present a busy scene every day, large numbers of the farmers taking advantage of the fine weather to secure their supplies for winter.

Now is the time for the young people of the town to make arrangements for the coming winter. As yet very little has been done in reference to a rink and if Wainwright is to hold its place in the E. A. H. L. this winter, it behooves them to get busy. We have the material here for a fine hockey aggregation and we should not miss the opportunity to advertise the town by having a winning team. Do something.

The development of Western Canada is best indicated by the extension of its transportation facilities. Twenty-five years ago the prairies knew not the railway. Ten years ago only a single pair of steel rails crossed the plains. To-day the Canadian Northern and the Grand Trunk Pacific trunks penetrate to the foot-hills of the Rockies, and the Canadian Pacific has a second line across the prairie well forward toward completion. This is speaking only of the lines spanning Western Canada clear across, and says nothing of the network of other lines.

Sir Thomas Shaughnessy has just been saying that the time for double tracking the original main line of the Canadian Pacific is already in sight. When that is done the first pair of steel rails from the Red River to the Rockies will have been increased to five.—Western Home Monthly.

Local Masons Attend Divine Worship

Members of Buffalo Park Lodge Listen to Impressive Sermon Delivered by Rev. R. Alderson in St. Thomas Church of England—The Sermon

The members of the Buffalo Park Masonic Lodge attended Divine service in St. Thomas Church of England on Sunday last. About thirty of the brethren marched from the lodge room to the church.

Rev. R. Alderson occupied the pulpit and delivered a very impressive sermon. The church was well filled.

Special music was rendered by the choir for the occasion and the entire services were very impressive.

Rev. Alderson took as his text, Rev. 22: 13—"I am Alpha and Omega, the first and the last, the beginning and the end." The sermon follows:—

We are met together today in the name of our Almighty Father. As Free Masons, our common desire is to promote and increase our knowledge of Divine Truth, by a serious contemplation of some precepts contained in the volumn of the sacred law; so that we may learn more of the sacred duties we owe to God, our neighbors and ourselves.

It is needless for me to remind you that the more important truths of morality are amply demonstrated by the wonders that nature displays. In fact the Great Architect of the universe, in Whose image our minds are formed, has expressed much of His Wisdom, Knowledge, Power and Beauty in the various forces and laws of the world in which we live. There is an immense and unbounded field of research for increasing our light and knowledge, open to us in our study of the hidden mysteries of Nature and Science. Ample evidence is afforded in the formation and regular control of matter, order, system, wisdom, and design in Creation. In the vastness and glory of the heavens, the mysterious secrets which are being elicited by the various sciences of Geometry and Astronomy; the beauty and art portrayed in mountain, forest, stream and rock; as shown by Geology, and above all in the study of God's highest and noblest work—man in anthropology from things that are inanimate, to the immortal "Lord of Creation," there is I say, proof of an original design or plan, clearly expressed in the mind of the Grand Geometrician of the universe. But the world and everything in it, as science shows, is teeming with life and activity, which indicates, that while God created and formed in the beginning, all things according to a Divine Plan, yet He did not leave the world of things and men, as a mechanic leaves an engine or a watch, to go till it works out, but that He assumed such a superintendence and control that His original intentions are continually being unfolded and involved in the ceaseless activity of all being and life. In other words men was involved in our creation than has ever yet been evolved. God has a plan of the Universe and is still working it out.

For while Nature and the soul of man are children of the same Father, history has conclusively shown that the Governor of the universe is specially concerned with man, who though in the present stage of his development is conditioned by the laws and properties of material substances, yet his real personal life and inner self is a discinct entity, governed and controlled by those eternal and unchanging moral laws of a Divine Being, who will reward merit and punish vice. From the dawn of human history, when God said "Let there be Light" the hand of the Moral Governor has gently guided and instructed the intellectual, moral and spiritual powers of mankind. We observe the best illustration of this afforded by the history of the Jews. We discover the initial plan which the Great Architect adopted, by which the Temple of Humanity was to be built. Nevertheless it took the human races a long time to penetrate beneath the veil and sorcerie of allegory and symbol, and to see the grand design of the Grand Geometrician. But in due time by patient faith and perserverying search for knowledge and truth, our efforts were rewarded.

At first man was in complete darkness, therefore with the love of a Perfect Father and the wisdom of a Perfect Plan, such light only, was imparted, as would not dazzle his eyes, or reveal the ghastly nakedness of his ignorance. The sacred counsels of the Most High were unfolded gradually as man was able to bear them. As you know they were first given to Abram, whose knowledge of these lesser lights, guided him to a Land of Divine Promise. Then to Isaac and Jacob and to his seed. That seed became the chosen people of God, a free and accepted community of brethern to whom Eternal Truths were revealed by the Great Architect and Ruler of the world. Those Divine precepts however were neither naked nor abstract, but veiled in allegory and illustrated by symbols. An advance in the evolution of man was made when the Architect's plan of the Temple was communicated to Solomon and our Grand Master Hiram Abif. Thus far the secrets of the Almighty were known fully to those who were properly initiated. The members and worshippers of that Holy Tabernacle were the keepers and repositories of sacred mysteries, and the Divinity appointed dispensers of revealed truths to those in darkness and ignorance outside the precincts of their order. Notwithstanding their favoured position in the attainment of so much light and knowledge, many and in fact most men in this age failed to discover the basis and centre of the great building up of the race of man. For such philosophies as those of Plato and Socrates, noble and profound as they were, could not offer any knowledge that was not already enclosed and given by Divine Revelation in the circle of that beautiful temple and worship of the Israelitish nation. In the Jews, man received and obtained the most perfect science of art, moral philosophy and spiritual truth of that day, which the lights of the age manifested in type and figure, but perfect, sublime and unerring light remained hid and veiled in the centre of the universe.

For we are well aware God cannot err. The plan of the Great Architect is to work from a centre to the circumference of the circle of the whole creation.

That centre was not uncovered nor revealed till the mysterious working of the Ruler of the universe laid it bare in the Son of God Incarnate. As soon as He was made known, mankind began to recognize in Him the great centre in the circle of humanity, the one True Light of the World, in comparison of Whom, all others fade into darkness. He became at once the First upon which all truth turns. The Touchstone of all that is pure and Divine, and the Magnet to whom all wise and virtuous men are drawn. We see in Him the Alphabet, the first letter and the last of the Great Architect's plan of the world. For Jesus is born and annointed as the Christ and centre of the universe, as He Himself says "I am Alpha and Omega the first and the last the beginning and the end." "The simple act of Creation was by Him." "In Him all things consist." The work and office of our restoration and development also centres in Him. From this premible then brethern, I would ask you to consider certain truths which necessarily follow from this basis of Christ's Central and All Soverign position among men, and let us observe that He is the centre and source of all true Light and knowledge.

The light that emanated from the Law of Moses and the prophets was the light of the stars, He is the noonday sun. The Old Testament is such a history that shows the Divine System in the education of the world, and just as that most beautiful Divinely appointed ritual and ceremonial of the Mosaic Dispensation was an admirable schoolmaster to lead men to Christ. So is Masonry calculated to be a useful handmaiden to true religion. No man could form a just estimate of the character of his supreme moral governor till Christ appeared with the Keys of God's treasury of grace and truth entirely in his own hands. "No man hath seen God at any time. The only begotten Son which is in the bosom of the Father, He hath declared Him." The eyes of our mortal nature had never beheld the Father's face, nor could we have borne the sight, so in the love and wisdom of the Eternal Being, this brightness and glory are veiled in human flesh by the Incarnation of His Son, Christ Jesus. He came as the Eternal Unchanging Light to be the life and power of our steady evolution into that character He revealed.

He will continue to shine till the end of the age and this method or stage of the Divine Government of the world. From the beginning the true "Hero" of the Sacred volume is Christ and its revelation culminates in Him. To give us such light as from this centre, involved great power, wisdom and love than to roll Neptune in its mighty orbit round the sun, or to uphold through countless aeons of ages, the circle of heaven's constellations.

The gathering mists of ages wrap in oblivion all other men and events of history, save one, but no distance of time or condition of mankind has yet dimmed the splendour of that Divine Incarnate Light. When we come to stand on the boundary of two worlds the only life that will bear the radiance of the Eternal Brightness will be that which has been measured from the Central Light of the world.

Science shows that we learn most truths by seeing, and as we look on that Divine Being veiled in the flesh of our own limitations our desire for knowledge is satisfied. In Him we find what the true Masonic mind demands, viz:—Perfection and Beauty, Symmetry of Form and Character, the beneficent and life giving rays of the one true light.

To be concluded next week.

The Stuttz Company

"Was She to Blame" First Dramatic Performance Ever Given in Wainwright

The first dramatic performance ever given in Wainwright was the attraction at the Auditorium on Tuesday evening last when the Stuttz Theatre company played "Was She to Blame" to a very good audience.

The fine work of the company elicited round after round of applause from the delighted audience. The members of the company handled their different parts in a finished manner and the fine points of the play were brought out in excellent shape. J. G. and Aggie Marion Stuttz were easily the stars and were greeted in a hearty manner by the audience each time they appeared.

Last night the company put on the favorite play "The Bells of Shandon" and delighted a large audience. Their offering tonight will be the old play "Rip Van Winkle" which was made world famous by Joseph Jefferson.

Tomorrow night "Crystal's Cross, or the Light of Lome" will be the bill, while on Saturday the last night of the engagement of this company in town, the well known comedy drama, "One of the Family," will be presented. This is the only play in which the entire company appear on the stage and the costumes are said to be exceptionally good. Those who have attended the performances already given by this company have no hesitation in recommending their friends to attend the performance of the company.

The Wainwright Pierrots Company will give their first concert in the Auditorium Opera House on Tuesday evening of next week. Programmes have been issued for the entertainment and a pleasant evening will no doubt be spent by those who attend.

Mixed Service To Edmonton

First Train for the West Leaves Here Monday—Tri-Weekly Service

W. E. Mills, president of Board of Trade, has received a wire from W. P. Hinton, general passenger agent of the Grand Trunk Pacific, stating that a mixed passenger service between Wainwright and Edmonton would commence on Monday morning, when the train will leave here at eight o'clock, arriving in Edmonton at six p. m. This service will be continued during the winter, the train running west on Mondays, Wednesdays and Fridays, returning the following days.

The Imperial Lumber Co. have purchased the business of the Pigeon Lake Saw Mills Co., at Irma, and has placed a large stock of lumber in the yards at that point. Carpenters are at present erecting large office and sheds at that point. P. J. Hardy, of Irma, will have charge of the yard.

There surely must be attraction in this town when twenty commercial men are registered here in one day. This number made their home at the Wainwright hotel on Sunday last. Evidently they have become wise to the excellent cuisine served at this splendid hostelry.

Andrew J. Powers, one of the yard crew met with an unfortunate accident on Wednesday. He was pulling the coupling lever on the engine when hand was caught. The doctor was immediately called and on examination of the injury found it necessary to amputate the thumb.

M. H. Fieldhouse of Neepawa, who has been visiting his sons H. V. and C. G., here for the past couple of weeks, left for his home on Wednesday.

Mrs. C. G. Fieldhouse, who has been visiting at her home in Rapid City, Man., for the past few months, returned to her home here a few days ago.

A very pleasant time was spent at the home of Mr. and Mrs. Isaac Fulton, of Greenshields, when the estimable couple their silver wedding. A large number of friends were present. The gathering broke up at a late hour after singing "Auld Lang Syne."

HOW TO KILL YOUR TOWN

Denounce your merchants because they make a profit on their goods.

Knife every man that disagrees with you on the matter of increasing business.

Make you own town out a bad place, and stab it every chance you get.

Government Estimate of Grain Yield

Averages for All Grains High—Greatest Crop in the History of the Province—Wheat Average Twenty-two Bushels Per Acre

Following is the official estimate which the government has made of this year's crop in Alberta. There may be some slight changes when the threshers returns are made, but so far as known the figures are approximately correct:

	Acres	Yield	Average
Wheat, spring	250,000	6,250,000	25
Wheat winter	80,000	2,000,000	25
Oats	500,000	20,000,000	40
Barley	100,000	3,500,000	35
Rye	1,000	18,000	18
Flax	9,700	82,450	8½
Spelts	500	11,500	23

Value of Canada's Fish

Fine Catch During Past Year---Will Reach Value of $25,451,085.

Ottawa Nov. 14.—The total value of the fish caught in Canadian waters during 1908 was $25,451,085. This is the most significant statement made in the annual report of the fisheries branch of the department of marine and fisheries. The revenue in 1908 was less than that of 1907 by $48,234 and less than 1906 by $238,400. That was the second highest year on record, 1905 being the record year. For that year, the total revenue was from $2,250,000 to $4,250,000 ahead of the years 1903-4. Although the total for 1908 is less than the two preceding years, the upward tendency has been well maintained. The commercial fish caught in Canadian water had a value of over a million dollars in 1908. They were: Salmon $4,814,250, lobster $4,300,270, cod $3,681,400, herring $2,471,603, mackerel $1,336,810, halibut, whitefish come next in order the catch being valued at $819,026.

A NOVEL SUGGESTION

Lord Dundonald, writing in the London Morning Post, suggests that each town and populous county of Great Britain should acquire large estates in Canada and the other dominions for relieving the unemployed problem, instead of spending money in useless relief works. All men should be emigrated under contract to keep to their agricultural communities for a specified time.

The Morning Post editorially emphasizes the fact that Canada wants men, not loafers, but endorses a duly safe-guarded scheme and hopes Lord Dundonald will see what practical steps can be taken immediately.

The Standard also endorses Dundonald's proposal, remarking that it is a business proposition, and as Lord Dundonald says, it is a paying investment on the one hand and means the employment of the workless on the other.

FOUR HUNDRED MILE CANAL TO BE BUILT

A despatch from London, England, says—A canal 425 miles long, connecting the St Lawrence with the Great Lakes, and providing an unbroken waterway from Chicago to the Atlantic ocean, will be constructed by Sir Robert Perks, M. P., whose retirement from parliament to devote his energies to the great engineering contract has been announced. It is estimated that the work will occupy ten years and will cost $125,000,000.

A WISE OBSERVATION

While thethree hers were at a certain farm-house the little boy came in and told his mother that the boss of the machine was saying some very bad words. "But" said his mother, "that man's mother died when he was a little boy, so no one told him that it was wrong to say such words."

The little fellow went out again, but very soon returned and said, "Mother, I think there are a lot of men out there that lost their mothers when they were little boys."

ALBERTA DAIRYING INCREASES

Commissioner Marker, of the Alberta dairy department, states that he expects the returns this year from the creameries will show a very large increase over the production of last year. Then the output was 2,107,489 pounds, the value of which was $526,871. There are now 21 government creameries and 35 owned by private capital. The market, he states, is very good. The Yukon took 400,000 pounds of Alberta butter last year, and British Columbia would consume far more western butter than it gets. That province is importing largely from the eastern provinces and the state of Washington.

BIG FIRE LOSS

The Monetary Times estimate of Canada's fire losses for the month of October is $2,208,717, which is the third highest monthly total this year. The losses for September were $1,615,405. The Dominion's losses for the first ten months aggregate $16,536,534. During October there were 26 lives lost in fires and since the beginning of the year the fire fatalities have numbered 151.

SAME OLD CAUSE

After a fire which recently occurred in South Wales an assessor sent in his report to the insurance corporation, a portion of which ran as follows: The junior partner informed me that the fire was caused by an arc light on the first floor; the second partner told me that the fire was caused by an incandescent light on the second floor; but my opinion is that it was caused by an Israelite in the basement.

CHAFF

"Now, who is that?" asked a dignified hen—
"That chicken in white and gray?
She's very well dressed, but whence did she come,
And her ancestors, who are they?"
"She never can move in our set my dear,"
Said the old hen's friend to her latter,
"I've just found out, you'll be shocked to hear,
She was hatched in an incubator."

HOW TO KILL YOUR TOWN

Kick.
Keep kicking,
And don't quit kicking,
One pull one way and one another,
Go to other towns and buy your goods.

COMMENT

'Tis now Wainwright's growing time

All praise to the members of the fire brigade for the splendid entertainment they furnished at their ball last week. We are pleased to learn that this will be an annual event, the fire fighters having decided to hold a masquerade ball on the evening of "Guy Fawkes' Day," Nov. 5th, each year.

From out of the West is borne on the wind a wail from Wainwright. The inhabitants of the Buffalo City have a grievance, and like true Westerners, they have no hesitation in making it known. Their trouble is this. Although the roadbed of the Grand Trunk Pacific from Wainwright to Edmonton has been completed for some time, there is as yet no regular train service between these "two important points," as the Wainwright people would say. Wainwright has not been slow in expressing its disapproval of the Grand Trunk Pacific, root and branch, for what seems to them totally unnecessary delay in putting on a through service.

But on delving into the matter it is found that Wainwright has been placing its money on the wrong buffalo. It appears that the Grand Trunk Pacific is not only willing but anxious to put on an express service but that the Railway Commissioners have not yet given permission. The reason for their refusal is an illustration of the mental twist of which only the official mind is capable. It appears that the Grand Trunk Pacific will be unable to finish fencing its track before the snow flies and that about thirty miles of the line will be without a fence until the spring. It is true that this thirty miles lies through a country that is practically unsettled and that there is consequently no danger of stray steers running into the G. T. P. trains from behind, but that does not matter at all to the Commissioners. It is possible, of course, that in their anxiety for the safety of the public they insist upon the track being fenced so that there shall be no danger of express trains leaving the track and wandering at large over the prairie. It is possible also that the settlers might drive their cattle in some fifteen or twenty miles from the surrounding country to graze upon the G. T. P. right-of-way, unless barred by woven wire. But at any rate the last thing to be thought of—the very last thing that enters into the mind of the Railway Commission, if it enters at all—is the convenience of the travelling public.

Although an express service is denied the settlers, the Railway Commission has given permission for a tri-weekly mixed service. The wisdom of the Commissioners transcends all human thought. Long, Burrows, Roosevelt, and all the rest of the nature fakirs are mere children in their knowledge of nature's history compared with our own Railway Commission. It is simply wonderful how close to nature the Commission must be to realize with such certainty that it hurts a colt less to be run over by a mixed train than by an express.

There may be some more deeply hidden reason which we know nothing about. To carry out this principle to its logical conclusion all the C. N. R. and most of the C. P. R. expresses would have to be taken off. A little thing like that doesn't worry the Railway Commission but it worries Wainwright almost to the point of stampeding.—Winnipeg Saturday Post.

Considerable disappointment has been expressed in town over the decision of the Grand Trunk Pacific to postpone the opening of the passenger service to Edmonton. The company have an excellent roadbed from here west and as the Railway Commission has authorized them to start the service we cannot see the reason for the delay. It is to be hoped the railway authorities will make a definite announcement shortly.

The annual meeting of the Alberta Amateur Hockey Association will be held in Red Deer on Saturday.

LOST—A pair of eyeglasses in leather case. Reward on return to Star office. 4

J. F. Adamson,
n.w. 24-44-6 Greenshields.

Saskatchewan's harvest this year is worth over $300 to every man, woman and child in the province. Do you wonder why Eastern factories are working overtime?—Brantford Expositor.

In some of the English illustrated weeklies we have seen pictures of men sitting astride wooden horses, "learning to ride" in preparation for work on ranches in Canada. There seems to be a misapprehension. Wooden horses are not ridden on ranches in Canada.—Lethbridge Herald.

A TALE OF A SPOTTED DOG

A small Kansas boy was once called in to view his new born baby brother. He looked it over with dissatisfaction, and finally asked: "Mamma, where did this thing come from?" "An angel brought it, Jimmie." "Ver you awake when he came?" "Certainly, Jimmie." "Well then, mamma, all that I have got to say, is that you are dead easy. I'd like to see any old angel put off such a looking thing on me. But I reckon we are stuck unless I kin work Johnny Green to trade it sight-unseen for one of his spotted pups."

Builda House for Yourself

IN WAINWRIGHT

It is useless to pay rent when you can pay for a house on the same terms. We can build you a house worth from $500 to $1500 for the small cash payment of $25 a month. It is just the same as paying rent and you own the house yourself.

Lots in Wainwright can be purchased by paying $10 a month with no interest.

Sub-division lots for $50, by paying $10 cash and $5 a month. NO INTEREST.
